1) added colouring, 2) caffeinated, 3) contains sweetener

Chocolate is not only our passion in solid or frozen form, but also in liquid form. That is why our hot chocolate is not simply made with cocoa powder, but „drops“ made from the finest Belgian chocolate are melted in hot milk. In addition to the four standard blends with different cocoa content, we also offer something very special: our single-origin chocolates.

While the standard chocolates are composed of a mixture of different cocoa types and qualities, single-origin chocolates consist exclusively of the cocoa fruits of one variety from a plantation. This creates a very authentic taste of unadulterated transported the quality of this exceptional fruit. The comparison between a single malt whiskey and a blended whiskey is often cited here and in fact similar flavors can be found.

This is how the manufacturer describes our **Single-Origin Ecuador**: „This dark chocolate convinces with a very round taste and intense cocoa note with strong roasted aromas and many fruity and sour notes. A hint of rum, whiskey and tobacco gives this chocolate its seductive, rounded and balanced character.“ and our **Single-Origin Sao Thomè**: „This dark chocolate has a very intense and complex taste of roasted cocoa beans with a fruity note of apricots, lemons and red fruits, as well as a hint of tea.“

We are curious to see if you can taste these flowery descriptions too... ;-)

## Melted Chocolate\*

free

\*Additives according to chocolate, lactose

Our unique coffee "Moone" thrives in the Malabar area on the south-west coast of India. It is soft in taste, low in acidity with a slight nutty, caramel note. Named after the "monsoining" process, whereby the coffee beans are moistened by the monsoon rain and then dry for several weeks by the natural winds.

## What is important to us

**Sustainability** is also an important concern for us. That is why we use more and more sustainable packaging and, where possible, do without plastics today. For example, we only use packaging and straws made from recyclable materials and renewable raw materials. When using our attractive "Schmelzcups" made of high-quality Kahla porcelain, we grant discounts in order to offer a financial incentive to do without disposable packaging.

We also place great value on conserving resources in our products. For example, for drinks from Charitea and Proviant from fair trade and in organic quality. Our electricity is also clean, because we have been using 100% green electricity for many years.

**Regional products** are great and where it makes sense we also offer them. On our menu you will only find beers from Welde, wines from the Dacksbuckel and coffee from the Rösterei Blank. After all, we are not a franchise, but a real Heidelberg company.

**Loyalty** pays off with us: collect melting points with every purchase on our melting card and we reward you with a free coffee or a free ice cream sample.

**In our online shop** you can conveniently and safely order our fine handmade chocolates or our gift vouchers around the clock.
